A Simple Mental Health Pain Scale

thegracefulpatient.wordpress.com

- MILD**
- 1** Everything is a-okay! There is absolutely nothing wrong. You're probably cuddling a fluffy kitten right now. Enjoy!
 - 2** You're a bit frustrated or disappointed, but you're easily distracted and cheered up with little effort.
 - 3** Things are bothering you, but you're coping. You might be overtired or hungry. The emotional equivalent of a headache.
- MODERATE**
- 4** Today is a bad day (or a few bad days). You still have the skills to get through it, but be gentle with yourself. Use self-care strategies.
 - 5** Your mental health is starting to impact on your everyday life. Easy things are becoming difficult. You should talk to your doctor.
 - 6** You can't do things the way you usually do them due to your mental health. Impulsive and compulsive thoughts may be hard to cope with.
- SEVERE**
- 7** You're avoiding things that make you more distressed, but that will make it worse. You should definitely seek help. This is serious.
 - 8** You can't hide your struggles anymore. You may have issues sleeping, eating, having fun, socialising, and work/study. Your mental health is affecting almost all parts of your life.
 - 9** You're at a critical point. You aren't functioning anymore. You need urgent help. You may be a risk to yourself or others if left untreated.
 - 10** The worst mental and emotional distress possible. You can no longer care for yourself. You can't imagine things getting any worse. Contact a crisis line immediately.

Rage Against the Machine never specified what type of machine they were furious with but I reckon it was probably a printer.
