

Today it is estimated that the Sensory Processing Disorder (TPS) affects approximately 3% of children and is the difficulty in processing and organizing sensory information. Sensory integration it is what turns sensations into a perception

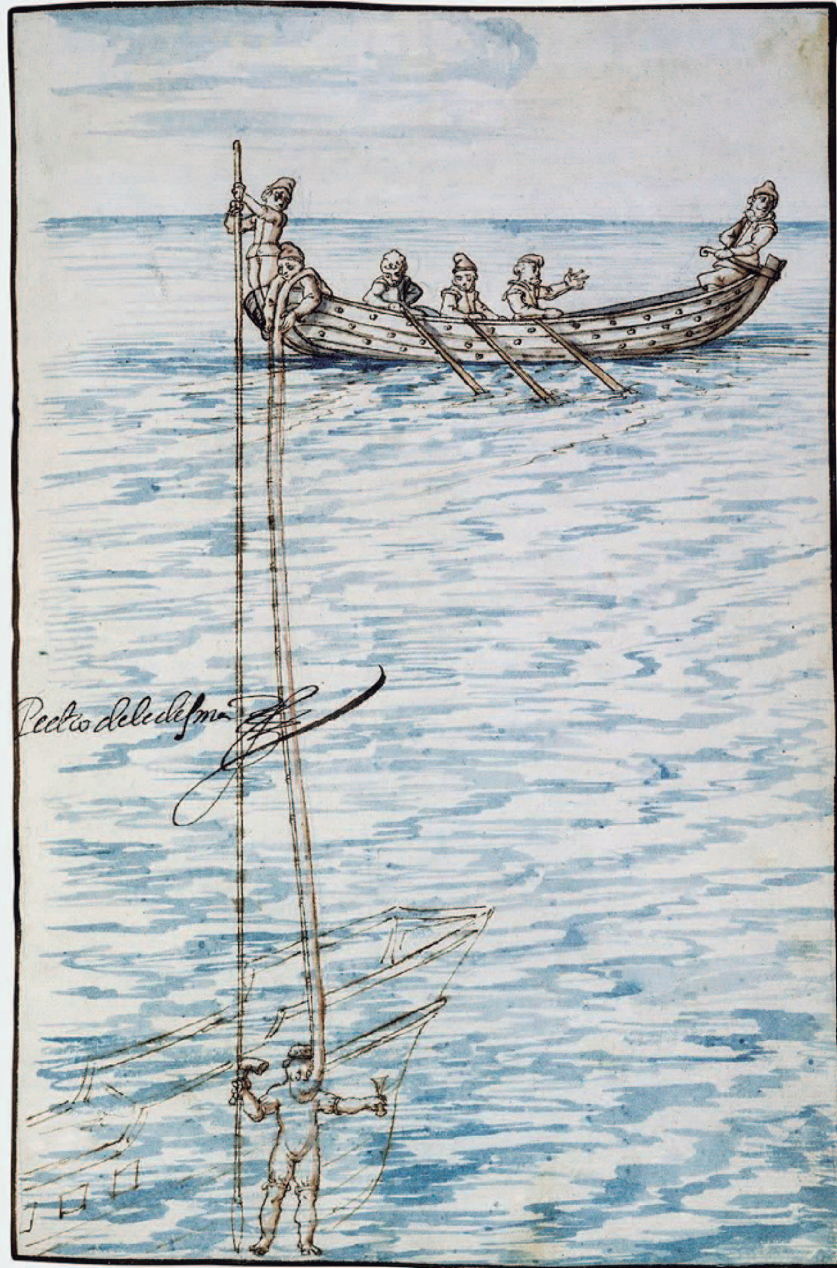

TPS can also occur with other diagnoses such as autism, Attention Deficit Hyperactivity Disorder (ADHD) or anxiety disorders, but it can also occur in a unique way.

-Look closely.

WHAT IF WE CAN  
RESCUE SOME PEARLS?

# book

Slowly the **printed books** are disappearing  
The book, today as yesterday, may have **another meaning...**

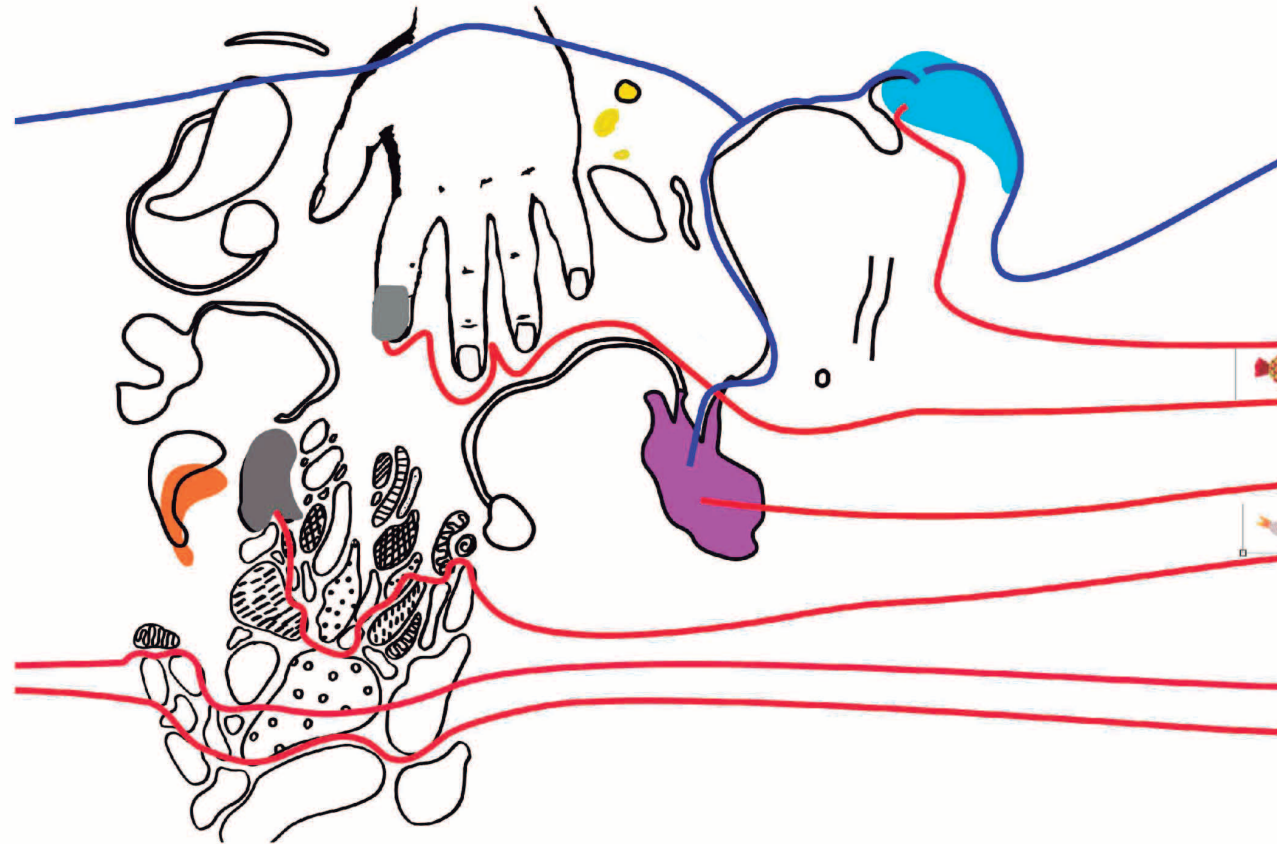

embroidery

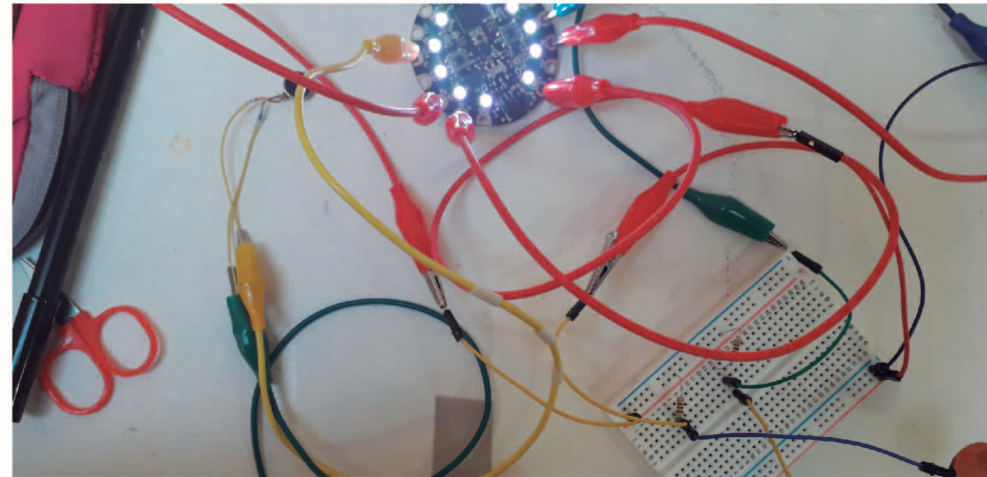

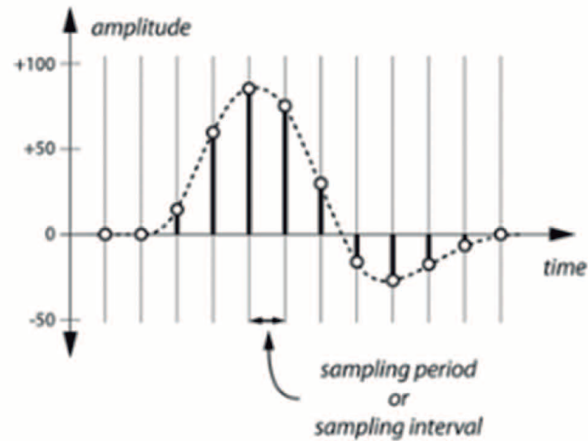

The **sense of touch** is as important as sight to learn and improve skills

illustration

Children, like adults, follow the world through images but, unlike the elderly, have a significant advantage in the **perception of details**. With the help of illustration, children recognize, identify and imagine. They build their **inner world**.

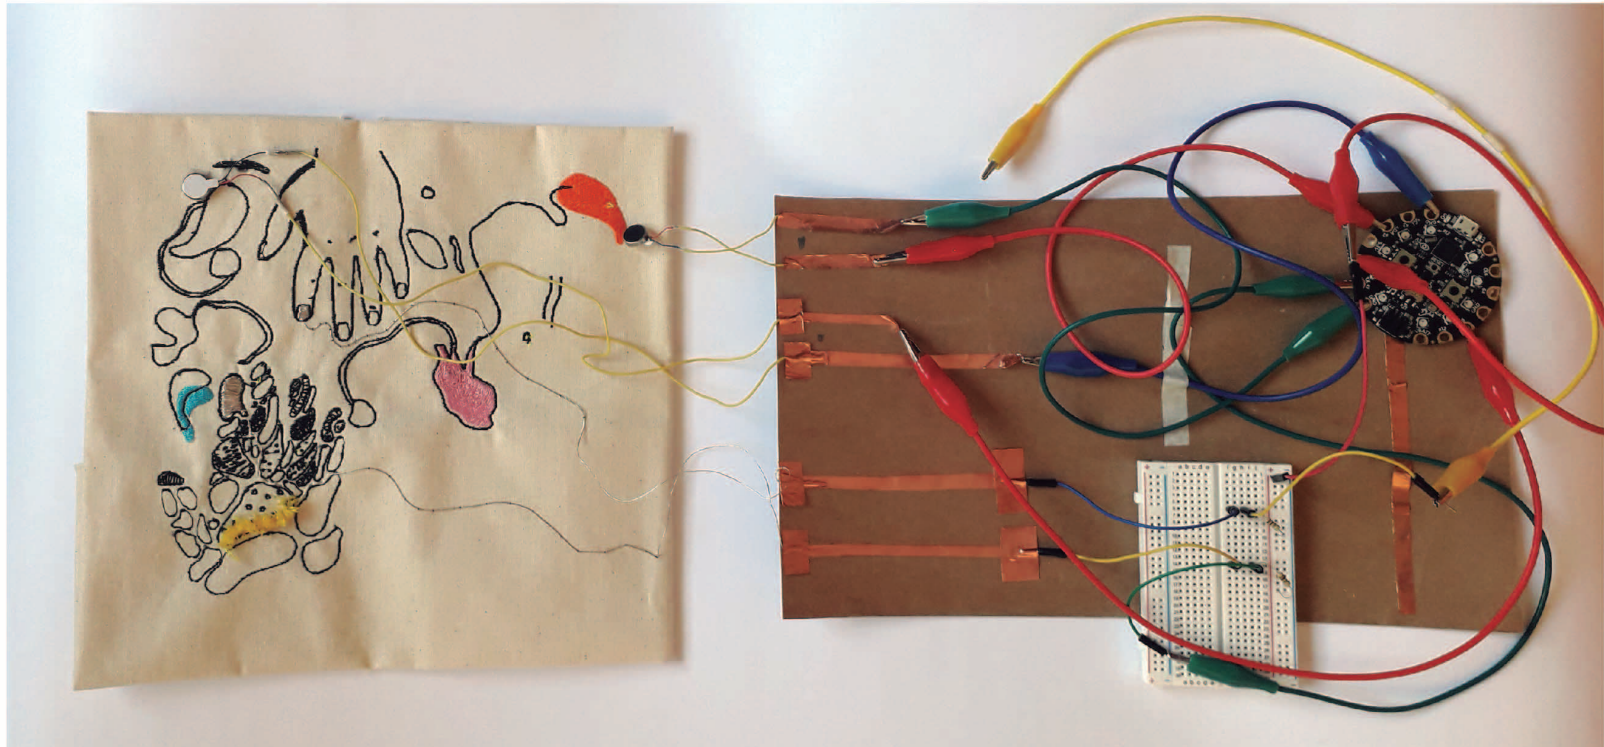

# from analog to digital values

IN PUT	OUTPUT	IMPACT
CAPACITIVE SENSOR	VIBRATION MOTORS	works the ability to feel their body like an everything.
MICROFONE	LIGHT	works the ability to follow objects with their eyes.
CAPACITIVE SENSOR	SPEAKER	works the ability to understand the distance between objects

# OKLLU **Soft book**

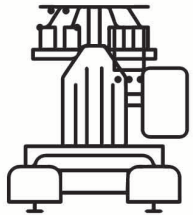

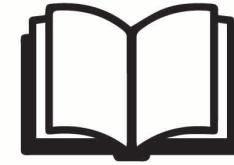

Soft book for childrens to work sensory regulation  
through interactions.

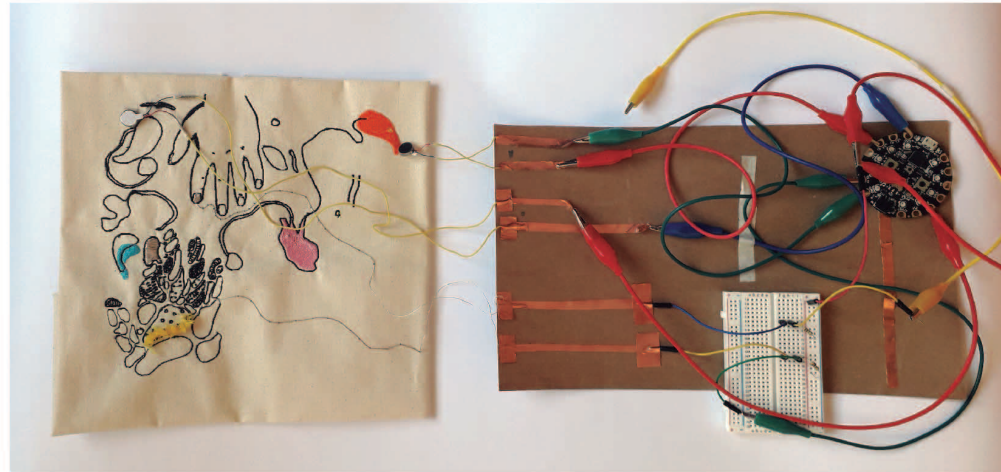

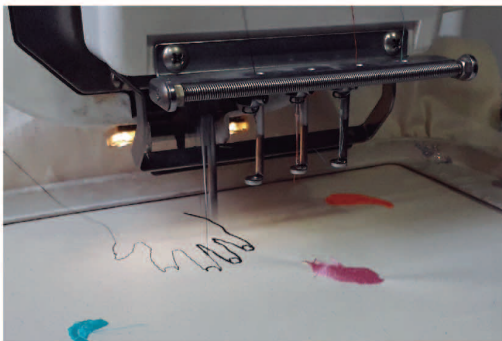

# fabrication and advantages
